Address Germany | **Website** <https://beerbuddy.app/>

United States

IM YOUR DOC

HIPAA compliant and regulated messaging app that is used by hospitals all across the US. The app offers a lot of functionality (messaging, video calls, document management, API integration with client's systems, etc) and all of them are on the highest security levels. The project covers mobile (iOS and Android) and web platforms.

Responsibilities on the project as the Product Manager:

- Organizing and coordinating the whole development team
- Planning upcoming releases
- Coordinating deployments of releases for multiple different platforms
- Gathering requirements and creating user stories out of the requirements
- Organizing and leading team meetings
- Being the middle man between the business and the development team
- Making sure everyone on the team has enough work prepared
- Removing blockers and impediments on the project

Responsibilities on the project as the QA Lead:

- Developing QA process and procedures
- Organizing and coordinating the QA Team
- Maintaining QA Documentation (Test Plans, Test Cases, etc.)
- Coordinating Regression cycles
- Reviewing bugs and bug reports
- Testing and reporting bugs
- Running regression testing after each deployment
- Tracking bugs and high detailed bug reports for developers
- Assisting the development team to figure out the issues
- Verifying and re-testing bug fixes

Address United States | **Website** <https://imyourdoc.com/>

NAMETESTS

An interactive game built inside Facebook Games that focuses on entering input, showing results and sharing the results on Facebook. Covers all Desktop and mobile devices.

Responsibilities on the project:

1. Creating Test cases and Test Plans for QA regressions
2. Coordinating and executing regression cycles on all desktop browsers and on all mobile devices
3. Maintaining QA Documentation (Test Plans, Test Cases, etc.)
4. Manual usability, performance, and UI/UX testing
5. Running regression testing after each deployment
6. Tracking bugs and high detailed bug reports for developers
7. Assisting the development team to figure out the issues
8. Verifying and re-testing bug fixes

Address Germany | **Website** <https://en2.nametests.com>

Italy

HUMANITAS

An Italian project revolving around medical services and the possibility to schedule a meeting with a doctor over the internet without having to go to the Hospital for a schedule. They offer the ability to pay for the meeting directly over the Internet as well.

- Creating Test cases and Test Plans for QA regressions
- Coordinating and executing regression cycles on both desktop and mobile devices
- Manual usability, performance and UI/UX testing
- Running regression testing after each deployment
- Tracking bugs and high detailed bug reports for developers
- Assisting the development team to figure out the issues
- Verifying and re-testing bug fixes

Address Italy | **Website** <https://www.humanitas.it>

VARIOUS SMALL PROJECTS ON UTEST & UPWORK PLATFORMS

While I was an active member on the uTest platform, I had the chance to work on various projects for different clients. Projects consisted of manual usability, performance and UI/UX testing.

Same goes for UpWork. Building up my profile consisted of multiple smaller QA jobs that were still important but just not as big and long term as the other projects above.
